

INVESTMENT STRATEGY

BNP PARIBAS FUNDS AQUA is a global equity sub-fund invested in the water sector. The sub-fund's objective is to select global companies tackling water-related challenges and which aim at helping or accelerating the transition to a more sustainable economy. These companies, within the global water value chain, support the protection and efficient use of water as a natural resource. The water sector includes, but is not limited to, water infrastructures (network, buildings, and industry equipment, infrastructure services and irrigation), water treatment (filtration, traditional treatment, efficiency, testing and monitoring) and utilities. The sub-fund is made up of 50 to 60 companies of which at least 20% of revenue is derived from one or more of the areas mentioned above. The data in this extra-financial report is compared to a reference thematic universe (around 260 stocks). The benchmark of the sub-fund is the MSCI World.

WHAT IS THE FRENCH SRI (SOCIALY RESPONSIBLE INVESTMENT) LABEL?

The sub-fund benefits from the French SRI Label. Created in 2016 by the French Ministry of Finance and Public Accounts, the SRI label aims to provide better visibility for investors on SRI funds. It also seeks to ensure that the fund management is based on strong methodologies with a high degree of transparency and quality information.

To obtain the SRI label, the fund must meet a specific set of criteria relating to:

- The general (financial and ESG) objectives of the fund. This entails verifying that these objectives are clearly defined and described to investors and taken into account when formulating the fund's investment policy
- The ESG criteria analysis and rating methodology used by the companies in which the fund invests
- The inclusion of ESG criteria during the portfolio's development and existence
- The ESG engagement policy with the companies in which the fund invests (voting and dialogue)
- Fund management transparency
- Measurement of the positive contribution of ESG management on the development of a sustainable economy

For more information regarding the SRI Label, please visit: <https://www.llabelisr.fr/en/what-sri-label/>

ESG INDICATORS OVER TIME

ENVIRONMENTAL:

Environmental: Weighted Average Carbon Footprint (CO₂ Eq/EV)

This indicator assesses the carbon footprint and is expressed in tCO₂eq /million € of enterprise value.

Coverage rate (Portfolio/Index) 100%/7%

Source: Impax Asset Management - December 2022

GOVERNANCE:

Independent directors on board (in %)

This indicator assesses the average percentage of independent directors on board within the portfolio's issuers.

Coverage rate (Portfolio/Index) 86%/67.4%

Source: Impax Asset Management - December 2022

SOCIAL:

Women on board (in %)

This indicator assesses the average percentage of women on boards within the portfolio's issuers.

Coverage rate (Portfolio/Index) 100%/77.7%

STEWARDSHIP ACTIVITY SUMMARY

VOTING ACTIVITY

In 2022, we voted a total of 680 resolutions within the fund

In 2022, we voted at 53 general meetings within the fund

Voting at annual general meetings is a key component of our ongoing engagement with companies: Shareholders with voting rights vote on issues such as appointments to the board of directors, executive compensation or financial operations.

Non significant rounding differences may exist.

ENGAGEMENT ACTIVITY

In 2022, we had a total of 28 engagements with companies within the fund

Source: Impax Asset Management - December 2022

For more information regarding our voting and engagement policies, please visit our webpage: (<https://www.bnpparibas-am.com/fr/sustainability>) and the one of IMPAX (<https://impaxam.com/insights-and-news/blog/engagement-and-policy-advocacy-report-2022>).

PORTFOLIO INVENTORY

The table below shows the name, country, sector and ESG decile of issuers in the portfolio.

Issuer name	Sector	Weight
		Portfolio

ENVIRONMENTAL CONTRIBUTION REPORT

As a complement, we are delighted to share Impax's annual update on the environmental contribution of BNP Paribas Aqua LUX. Every Impax strategy is designed to intentionally allocate clients' capital towards those companies that they expect to flourish as the global economy transitions to a more sustainable model, and to reduce or eliminate exposure to potential losers from that transition. This environmental contribution report provides post-investment evidence of this intentionality.

The contribution reported relates to the benefits that the products and services of the investee companies are enabling. Investing in such companies doesn't increase or add to that environmental contribution but is a concrete demonstration that the investment is very strongly aligned to companies benefiting from and enabling the transition to a more sustainable economy.

Since the size of the sub-fund(s) can vary from one year to the next, we have standardised the environmental benefit at EUR 10 million invested as well as reporting on the total sub-fund.

ENVIRONMENTAL CONTRIBUTION

	OF €10 MILLION	OF TOTAL FUND	ENVIRONMENTAL CONTRIBUTION
 Total water provided	370 megalitres	157,100 megalitres	
 Total water saved	700 megalitres	299,820 megalitres	
 Total water treated	1,530 megalitres	654,580 megalitres	
	16,690 households	7,135,980 households	Equivalent to x households' water consumption in 2021

These data refer to the past. Past performance is no guarantee of future performance.

Source: Impax Asset Management. Environmental contribution of investment in the fund for one year. Based on most recently reported annual environmental data for holdings and assets under management in the BNPP Aqua (FCP) Fund as at 31 December 2021. Impax's environmental contribution methodology is based on equity value. As the value of the holdings can vary between years, Impax has standardized environmental benefit to €10m invested, and also reported on the total value of the holdings as at 31 December 2021.

IMPAX METHODOLOGY FOR ENVIRONMENTAL STRATEGIES

The relevant environmental metrics for all portfolio companies were measured where data was available or could be estimated. The analysis included all companies in which the funds were invested as at 31 December 2021. At the time of preparation, Impax aimed to obtain most recently available and commonly collected environmental data from its investee companies. For approximately 86% of companies this was from 2021 reported information and for the remainder of companies this was from previously reported information.

The percentage owned in each underlying company (calculated based on the proportion of shares owned) as at 31 December 2020 was applied to measure the environmental benefit attributable to the funds.

Impax started by identifying the metrics against which it would measure the environmental contribution of the companies. These included:

- Greenhouse gas (GHG) emissions (tonnes of CO₂ equivalent)
- Greenhouse gas (GHG) avoidance (tonnes of CO₂ equivalent)
- Net contribution from GHG emitted less GHG avoided (tonnes of CO₂ equivalent)
- Renewable electricity generated (MWh)
- Water treated, saved or provided (megalitres)
- Materials recovered/waste treated (tonnes)
- Coal displaced in Asian cities (tonnes)

The relevance of each metric was also assessed for each company based on their business activities:

- Impax created a heat map which provided a qualitative indication for the positive contribution of each company
- Impax collected relevant data from company disclosures, including sources such as annual reports, CDP and sustainability reports. Where information was not available, Impax contacted companies to request additional disclosure, which in some cases produced additional relevant data
- However, some companies could not/did not provide information on several metrics. Impax therefore created estimates for these data points based on relevant peer groups of companies which do disclose this information. Impax has been conservative with all its estimates to ensure that it does not overstate the positive environmental contribution, or in the case of carbon dioxide emissions, the net emissions avoided

The environmental contribution of the sub-fund's investments will always depend on the mix of underlying holdings and are thus subject to change.

CLASSIFICATIONS: SFDR | ARTICLE 9* - AMF | Cat. 1**

* Following the new Sustainable Finance Disclosure Regulation (SFDR) that came into force on 10 March 2021, BNP Paribas Aqua LUX is categorised under Article 9. Under this new regulation, financial entities such as BNP Paribas Asset Management who sell products into the EU are required to classify the products they manufacture or advise into three categories: Article 9 (products with a sustainable investment objective), Article 8 (products promoting environmental or social characteristics), Article 6 (non-sustainable products).

** Category 1: approach based on a significant engagement / Category 2 : approach based on a non-significant engagement / Category 3 : Approach that does not reach standards of central or restricted communication.

BNPP AM'S RESPONSIBLE BUSINESS CONDUCT POLICY

EXCLUDED SECTORS

We have a set of policies that commit us to exclude particular sectors or activities, as we deem them to be in violation of international norms, or to cause unacceptable harm to society and/or the environment, without counterbalancing benefits. These are generally sectors where engagement is unlikely to be constructive.

Tobacco

Controversial
WeaponsElectricity generation
from coalThermal coal
extraction

Asbestos

Unconventional oil
& gas

For controversial activities, we highlight mandatory sector Responsible Business Conduct requirements which have to be met by issuers in order for BNP Paribas Asset Management to invest. We do this because if the activities in question are not conducted properly, then they could cause serious social or environmental damage.

Agriculture

Nuclear Power Generation

Palm oil

Wood pulp

Mining

NORMS-BASED SCREENING

We expect companies to meet their fundamental obligations in the areas of human and labour rights, protecting the environment and ensuring anti-corruption safeguards, wherever they operate, in line with the:

- UN Global Compact Principles,
- OECD Guidelines for Multinational Enterprises (OECD MNEs Guidelines).

We aim to engage with companies where they fall short, and exclude the worst offenders.

For more information regarding our Responsible Business Conduct Policy, please visit our webpage:
<https://www.bnpparibas-am.com/en/sustainability/>

GLOSSARY

Engagement activities

Engagement is active dialogue with corporates with a specific and targeted objective. Meaningful engagement with issuers can enhance our investment processes and better enable us to successfully manage long-term risk for our clients by promoting strong ESG practices in the companies in which we invest on their behalf. BNP Paribas Asset Management's Stewardship Policy explains our approach toward engagement.

Portfolio carbon footprint

The portfolio carbon footprint is the sum of each company's carbon emissions divided by its simplified enterprise value, multiplied by the company's weight in the portfolio. Carbon emissions represent the sum of scope 1 emissions (direct emissions from the company's facilities) and scope 2 emissions (indirect emissions linked to the company's energy consumption) from a company. The simplified enterprise value measures a company's total value and is calculated as the sum of the company's market capitalization and total debt. The footprint is expressed in tons of CO2 equivalent per million euros invested. Our carbon data provider is Trucost. To provide examples of what the carbon footprint gap between the fund and its benchmark is equivalent to, BNPP AM has used U.S EPA data for car CO2 emissions and IEA data for annual CO2 emissions of homes linked to electricity use. Both data points are based on average emissions in the U.S.

United Nations Global Compact compliance

The UN Global Compact Principles promote 10 major principles applicable to companies in the areas of respect for human rights, labour standards, environmental protection and business ethics. This indicator assesses the percentage of issuers within a portfolio that are compliant with the UN Global Compact.

Women on boards

Corporate governance is assessed through various indicators, including the presence of women on board of directors. We believe that diversity on corporate boards can contribute positively towards shareholders' long-term interests. This indicator assesses the average percentage of women on boards within the portfolio's issuers.

Exercise of Voting Rights

Voting at annual general meetings is a key component of ongoing engagement with companies: Shareholders with voting rights vote on issues such as the appointments of the board of directors, executive compensation or financial operations.

Board independence

A right corporation governance is measured through several indicators as the presence of independent directors on boards. This indicator assesses the average percentage of independent directors within issuers' boards of this portfolio.

Coverage

Within a portfolio or a benchmark the coverage represents the percentage of securities that have an ESG score, a carbon footprint or any other relevant indicator for this report.

The investments in the funds are subject to market fluctuations and the risks inherent in investments in securities. The value of investments and the income they generate may go down as well as up and it is possible that investors will not recover their initial outlay, the fund(s) described being at risk of capital loss.

For a Complete description and definition of risks, please consult the last available prospectus and KID of the fund(s).

RISKS & DISCLAIMER

Risks

The investments in the funds are subject to market fluctuations and the risks inherent in investments in securities. The value of investments and the income they generate may go down as well as up and it is possible that investors will not recover their initial outlay, the fund described being at risk of capital loss.

For a Complete description and definition of risks, please consult the last available prospectus and KIID of the fund.

Environmental, Social and Governance (ESG) Investment Risk

The lack of common or harmonized definitions and labels integrating ESG and sustainability criteria at EU level may result in different approaches by managers when setting ESG objectives. This also means that it may be difficult to compare strategies integrating ESG and sustainability criteria to the extent that the selection and weightings applied to select investments may be based on metrics that may share the same name but have different underlying meanings. In evaluating a security based on the ESG and sustainability criteria, the Investment Manager may also use data sources provided by external ESG research providers. Given the evolving nature of ESG, these data sources may for the time being be incomplete, inaccurate or unavailable. Applying responsible business conduct standards in the investment process may lead to the exclusion of securities of certain issuers. Consequently, the Sub-Fund's performance may at times be better or worse than the performance of comparable funds that do not apply such standards.

Disclaimer

BNP PARIBAS ASSET MANAGEMENT France, "the investment management company", is a simplified joint stock company with its registered office at 1 boulevard Haussmann 75009 Paris, France, RCS Paris 319 378 832, registered with the "Autorité des marchés financiers" under number GP 96002.

This material is issued and has been prepared by the investment management company.

This material is produced for information purposes only and does not constitute:

1. an offer to buy nor a solicitation to sell, nor shall it form the basis of or be relied upon in connection with any contract or commitment whatsoever or
2. investment advice.

This material makes reference to certain financial instruments authorised and regulated in their jurisdiction(s) of incorporation.

No action has been taken which would permit the public offering of the financial instrument(s) in any other jurisdiction, except as indicated in the most recent prospectus of the relevant financial instrument(s), or on the website (under heading "our funds"), where such action would be required, in particular, in the United States, to US persons (as such term is defined in Regulation S of the United States Securities Act of 1933). Prior to any subscription in a country in which such financial instrument(s) is/are registered, investors should verify any legal constraints or restrictions there may be in connection with the subscription, purchase, possession or sale of the financial instrument(s).

Investors considering subscribing to the financial instrument(s) should read carefully the most recent prospectus and Key Information Document (KID) and consult the financial instrument(s)' most recent financial reports.

These documents are available in the language of the country in which the financial instrument(s) is authorised for the distribution and/or in English as the case may be, on the following website, under heading "our funds": <https://www.bnpparibas-am.com/>

Opinions included in this material constitute the judgement of the investment management company at the time specified and may be subject to change without notice. The investment management company is not obliged to update or alter the information or opinions contained within this material. Investors should consult their own legal and tax advisors in respect of legal, accounting, domicile and tax advice prior to investing in the financial instrument(s) in order to make an independent determination of the suitability and consequences of an investment therein, if permitted. Please note that different types of investments, if contained within this material, involve varying degrees of risk and there can be no assurance that any specific investment may either be suitable, appropriate or profitable for an investor's investment portfolio.

Given the economic and market risks, there can be no assurance that the financial instrument(s) will achieve its/their investment objectives. Returns may be affected by, amongst other things, investment strategies or objectives of the financial instrument(s) and material market and economic conditions, including interest rates, market terms and general market conditions. The different strategies applied to financial instruments may have a significant effect on the results presented in this material. Past performance is not a guide to future performance and the value of the investments in financial instrument(s) may go down as well as up. Investors may not get back the amount they originally invested.

The performance data, as applicable, reflected in this material, do not take into account the commissions, costs incurred on the issue and redemption and taxes.
